

Starry Night™ Sleep Technology and Lifeware™

Starry Night Sleep Technology (www.StarryNightBed.com) by Leggett and Platt and Lifeware from Exceptional Innovation have partnered to bring the ultimate experience in home automation and sleep intelligence to the bedroom.

- Lifeware connects the diagnostic and entertainment features of Starry Night with other electronic components in the bedroom and throughout the house.
- Via wireless remote, users can program the bed to interact with lighting controls, the thermostat, the security system or the media center.
- Examples of how Starry Night and Lifeware can be programmed to create custom experiences for users include:
 - Read Mode – When activated by remote, Read mode will raise the head of the bed to a comfortable sitting or lounging position, turn on the bedside lamp, turn off the television and lower the ceiling lights to make a cozy space for devouring the latest mystery or romance novel.
 - Relax Mode – Have trouble making the transition from daytime activity to nighttime rest? Program the bed to massage your aching body, lower the lighting and room temperature, and play your favorite “unwind” music 15 minutes before bedtime.
 - Romance Mode – Make nighttime the right time by creating an atmosphere for intimacy. Activate the Romance mode to dim the lights, draw the curtains and play some classic Barry White.

Leggett & Platt is a Fortune 500 diversified manufacturer that conceives, designs and produces a variety of engineered components and products that can be found in virtually every home, office, retail store and automobile. The company serves a broad suite of customers that comprise a "Who's Who" of U.S. manufacturers and retailers. The 125-year-old firm is composed of 28 business units, 31,000 employee-partners, and over 300 facilities in over 20 countries. For more information, visit www.Leggett.com.

Exceptional Innovation produces Life|ware™ home control software and hardware for digital living. Life|ware creates a lifestyle experience that allows consumers to enjoy their digital entertainment, wherever and whenever they want, as well as manage their lighting, multi-room audio, HVAC, security, appliances and other subsystems, through a single interface by integrating the digital entertainment functionality of Media Center with whole-house automation and control. For more information, visit www.Exceptionalinnovation.com.
